

MYTH: You can't define yourself as a lesbian if you enjoy penetrative sex and use dildos.

TRUTH: I can't begin to count how many times I have been asked this question...especially since I invented a dildo that ejaculates and looks similar to a phallic penis. For me, sex is much more about emotional and physical connection than the actual "equipment" being used and I think many, if not most lesbians would agree. When men ask this question, I think it's much more about ego than their lack of understanding.

Myth buster. Just because we don't want to have sex with you doesn't mean we can't or don't enjoy penetrative sex! Men will also ask, "if lesbians want to get pregnant and will use an ejaculating dildo to do so, why not just have sex with a man?" Myth buster. Same response applies here, fellas!
